

# Discover the Smooth-Q

## 3-AXIS SMARTPHONE STABILISER

Take your video production to the next level by using this compact and portable gimbal which is simply attached to your smartphone. The Smooth-Q stabilises your phone enabling you to create smooth and professional video content.

With 12 hours of run time you can produce shake-free videos to use across your social media channels and all creative marketing campaigns. Capture high quality listing walk through videos, agent profile videos, interviews and more.

Smooth-Q has the ability to shoot all videos in both portrait and landscape, while also giving you the option to set the mode to focus or trigger. Additional features are built-in rechargeable lithium ion batteries, USB output for charging other devices and a cleaning kit (including gloves, cleaning brush and microfiber cloth).
